## Summary

As an aspiring software engineer, my inaugural work experience has sparked a fervent enthusiasm for crafting pioneering software solutions. Committed to perpetual learning, I've established a strong foundation in web development, software programming, and network analysis, which equips me to navigate intricate challenges and innovate pragmatic solutions to real-world predicaments. My immersion in diverse software development and IT tasks has honed my skills and broadened my knowledge. A proactive and versatile approach, honed through configuring software solutions, user training, and optimizing network performance, enables me to offer new perspectives to any team. Empowered by this experience, I am primed to contribute dynamically by integrating my drive for growth with my adept application of software engineering principles, eager to drive innovation and excel in the field.

## Work Experiences

### Software Development and IT Intern

*Amoswell Networking Services - [May 2023- August 2023]*

- Collaborated in designing, developing, and deploying software applications to enhance operational efficiency and user experience.
- Configured and customized software solutions to align with specific client requirements, ensuring seamless integration and functionality.
- Engaged in full software development lifecycle, from requirement analysis and coding to testing, debugging, and deployment.
- Conducted user training sessions for new software, facilitating end-user understanding and successful adoption.

## Projects

- Created a payroll management system with time and attendance tracking and leave management
- Developed an E-vaccination tracking mobile application

## Skills

### Languages

- JavaScript, Typescript, PHP, Python, SQL, HTML5, CSS3

### Version control systems

- Git

### Tools and Technologies

- Visual studio code, IntelliJ IDEA, Github

## Others

- Bootstrap, Tailwind, PostgreSQL, MySQL

## Education

- Zetech university- Bachelor of Science in Information Technology

## Languages

- English **C1** *Professional working fluency*
- Swahili **C2** *Native or bilingual*

## Interests and Hobbies

- Bootcamps, Coding challenges, and Conferences
- Game development
- Machine Learning
